Re: Stephens vs. Group 1 Automotive Inc. & ABC Repair Corp.

Dear Ms. Averill,

I have completed my review of the documents provided by your office in the above mentioned case. These include the following:

- Texas Peace Officer's Crash Report
- Deposition of Kendrea Stephens
- Legacy Pain Associates records
- CVS and Walgreens pharmacy records
- Plaintiff's original complaint for damages

The opinions in this report are based on my review of these documents, and I reserve the right to change those opinions should additional information become available. A current copy of my curriculum vitae is attached.

The Texas Peace Officer's Crash report indicates that on September 5, 2018 Kendrea Cortes Stephens was involved in a single vehicle accident at 9:30 AM in Harris County, TX. Records indicate that while turning right into a parking lot, the vehicle struck a pole (gate). Ms. Stephens sustained serious injuries and was transported by ambulance to hospital. She underwent reconstructive facial surgery in December 2018 and continues to receive treatment for facial and head pain. In her deposition, Ms. Stephens describes experiencing migraines, vertigo, tingling, numbness, memory loss, and other symptoms. In her deposition, Stephens testified that she takes "several medications" that cause her to be "drowsy" and experience "side effects", including bouts of dizziness. She indicates that her prescription drugs include [7.5 mg] hydrocodone (5/day), [50 mg], Topamax (4/day) and [300 mg] gabapentin (3/day).

Prescription drug records indicate that Ms. Stephens has received hydrocodone for pain since September 2018. As part of her ongoing pain management, she is subject to urine drug analysis for compliance purposes.

Hydrocodone is a narcotic analgesic drug that is prescribed for the treatment of moderate to severe pain in doses of 5-10 mg every 4-6 hours, typically not to exceed 45 mg per day. This is consistent with records provided that indicate Ms. Stephens had been prescribed 7.5 mg hydrocodone up to six times a day (45 mg total). Side effects of hydrocodone can include somnolence and central nervous system depressant effects. This may include tiredness, weakness, mental clouding and dizziness.

Gabapentin is an anticonvulsant (used to treat seizures) and is also used as an adjunctive therapeutic agent for pain. It is administered in daily (divided) doses of 300-1800 mg. Gabapentin is also capable of producing somnolence, weakness, dizziness, ataxia and fatigue. Topiramate (Topamax) is prescribed for the treatment of seizures, migraine headaches, psychiatric disorders and neuropathic pain. Side effects of this drug may include drowsiness, dizziness, numbness, tingling in the hands or feet, memory problems and difficulty concentrating.

Although it is not possible to determine the exact etiology of the symptoms described by Stephens, it is well-established that the side effects associated with these prescribed medications may be *additive*. Therefore, the potential for drowsiness, dizziness and memory effects described by Stephens may be increased.

Sincerely,

Sarah Kerrigan, Ph.D.

## **AWARDS**

### ROLLA N. HARGER AWARD, AMERICAN ACADEMY OF FORENSIC SCIENCES

Awarded for outstanding contributions in forensic toxicology and advancement of the profession.

### OUTSTANDING DRE PROGRAM INNOVATION

Awarded by The International Association of Chiefs of Police (IACP)/CANDID, Baltimore, MD (2003).

### IRVING SUNSHINE TOXICOLOGY AWARD

Awarded by the American Academy for Forensic Sciences in recognition of achievements (2002).

### NEW MEXICO HIGHWAY AND TRANSPORTATION DEPARTMENT, TRAFFIC SAFETY BUREAU AWARD

Awarded by the Traffic Safety Bureau for Dedication, Commitment and Perseverance, Annual Traffic Safety Summit (2002).

### SOCIETY OF FORENSIC TOXICOLOGISTS PRESENTATION AWARD

Awarded by the Society of Forensic Toxicologists for a scientific presentation made at the annual meeting in Puerto Rico (1999).

### LAIRD FELLOWSHIP

Awarded by the University of British Columbia, Vancouver, Canada, for academic excellence in research (1993 - 1997).

### UNIVERSITY GRADUATE FELLOWSHIP

Awarded by the University of British Columbia, Vancouver, Canada, for academic excellence in research (1993-1997).

### B.P. CHEMICALS PRIZE

Awarded by B.P. Chemicals in the UK for outstanding academic achievement (1992).

### JOHN JACKSON MEMORIAL PRIZE FOR TOXICOLOGY

Awarded by The London Toxicology Group to an outstanding toxicologist in the UK under the age of 26 (1992).

### PRYCE-JONES PRIZE

Awarded by The University of Hull for outstanding academic performance (1990).
